WASH Projects – Ghana Phase 1 Impact Report (2025/2026)

Overview

In partnership with DONA, Ryan's Well Foundation successfully implemented Phase 1 of the 2025/2026 WASH Projects in two rural communities, three health facilities, and five schools in Ghana. The interventions aimed to provide sustainable clean water access, improve sanitation infrastructure, and enhance hygiene practices, benefiting over 83,000 people.

Key Achievements

- 10 deep boreholes constructed (8 mechanized, 2 with Afridev hand pumps).
- 8 elevated reservoirs, 20 handwashing stations, and 8 standpipes installed.
- 20 sinks installed in schools and health facilities.
- WASH training delivered to all stakeholders on hygiene, maintenance, and community ownership.
- School Health Committees and Water and Sanitation Management Teams (WSMTs) formed to ensure sustainability.

Impact Highlights

- Communities now access clean water within walking distance, reducing the burden on women and children.
- Health facilities improved clinical hygiene standards and sterilization practices.
- Schools saw better attendance, improved hygiene, and elimination of time lost fetching water.
- Inspired new demand from neighboring communities and schools for similar interventions.
- Plans for sustainable impact been put in place for all the benefiting communities.

Key Insights:

- Highest Impact: *Water for (Health Centres)* has the greatest reach, serving 80,620 people, over just 3 sites.
- WASH for Schools: Although the number of sites is higher (5), the total population served is smaller (2,188), indicating a focus on targeted educational institutions.
- Community Water Projects: Covered 2 communities with Afridev pump systems, serving 1,124 people.

Beneficiaries Table

#	Name of Well	Site	District	Population Served	Remarks
1	Water for CHPs	Debra Taabosere CHPs	Ahafo Ano South-East	19,562	Deep well with 3 WASH stations & standpipe
2	Water for CHPs	Fawoman Wamasi CHPs	Adansi Akrofrom	36,821	Deep well with 2 WASH stations & standpipe
3	Water for CHPs	Ahyiresu Freboye CHPs	Ahafo Ano South-East	24,237	Deep well with 2 WASH stations & standpipe
4	Water & WASH for Schools	Addaikrom Kwaoso D/A Basic School	Ahafo Ano South-East	503	Deep well with 2 WASH stations & standpipe
5	Water & WASH for Schools	Bredi Bonkuro D/A Basic School	Ahafo Ano South-East	357	Deep well with 2 WASH stations & standpipe
6	Water & WASH for Schools	Atuobokrom Mpentemua D/A Basic School	Ahafo Ano South-East	698	Deep well with 3 WASH stations & standpipe
7	Water & WASH for Schools	Otaakrom Odem D/A Basic School	Ahafo Ano South-East	322	Deep well with 3 WASH stations & standpipe
8	Water & WASH for Schools	Fenaso Kwaadokrom D/A Basic School	Amansie Central	308	Deep well with 3 WASH stations & standpipe
9	Community Water	Tsotsobuoso II	Adansi North	472	Deep well with Afridev pump system
10	Community Water	Tsotsobuoso III	Adansi North	652	Deep well with Afridev pump system
TOTAL				83,932	

Conclusion

This first phase of the Ryan's Well Foundation's WASH project in Ghana marks a transformational impact—empowering communities, schools, and health centers with sustainable water access and hygiene solutions. Strong local ownership, widespread training, and successful implementation are paving the way for expansion in Phase 2.
