WASH Projects Phase II Update – Ashanti Region, Ghana

Overview:

The Phase II of the 2025/2026 Water, Sanitation, and Hygiene (WASH) Project in the Ashanti Region, Ghana, has successfully improved access to safe and clean water in eight schools. These schools include:

1. Banahenkrom Abodom Primary School
2. Aburaso Nweneso D/A Primary School
3. Nsuta Mpasatie D/A Basic School
4. Bokuruwa Brofoyeddu Basic School
5. Amokrom Nahin D/A Primary School
6. Brepro Mpranease D/A Primary School
7. Awherewam Adukorama D/A Primary School
8. Gyaukrom Akokorso D/A JHS

Project Achievements:

- **Eight deep boreholes** constructed across eight communities.
- **Overhead water reservoir stands** installed at all sites.
- **School Health Committees** formed to ensure sustainability and hygiene promotion.
- **Community mobilization** and **handwashing training** activities.

Project Table Summary

#	School Name	Population	District	Remarks
1	Banahenkrom Abodom Primary School	567	Amansie West	Deep well constructed
2	Aburaso Nweneso D/A Primary School	228	Amansie West	Deep well constructed
3	Nsuta Mpasatie D/A Basic School	670	Amansie West	Deep well constructed
4	Bokuruwa Brofoyeddu Basic School	285	Amansie West	Deep well constructed
5	Amokrom Nahin D/A Primary School	283	Amansie West	Deep well constructed
6	Brepro Mpranease D/A Primary School	270	Amansie West	Deep well constructed
7	Awherewam Adukorama D/A Primary School	290	Amansie West	Deep well constructed
8	Gyaukrom Akokorso D/A JHS	380	Amansie West	Deep well constructed
	TOTAL	2,973		

Benefits and Impact

- **Improved health:** Reduced incidence of waterborne diseases such as diarrhea and typhoid among school children.
- **Enhanced school attendance:** Students, particularly girls, no longer miss classes in search of water.
- **Promoted hygiene practices:** Handwashing and sanitation education integrated through School Health Committees.
- **Strengthened community ownership:** Local participation ensures sustainability and protection of water sources.
- **Empowerment of schools:** Access to safe water fosters a better learning environment and overall child well-being.

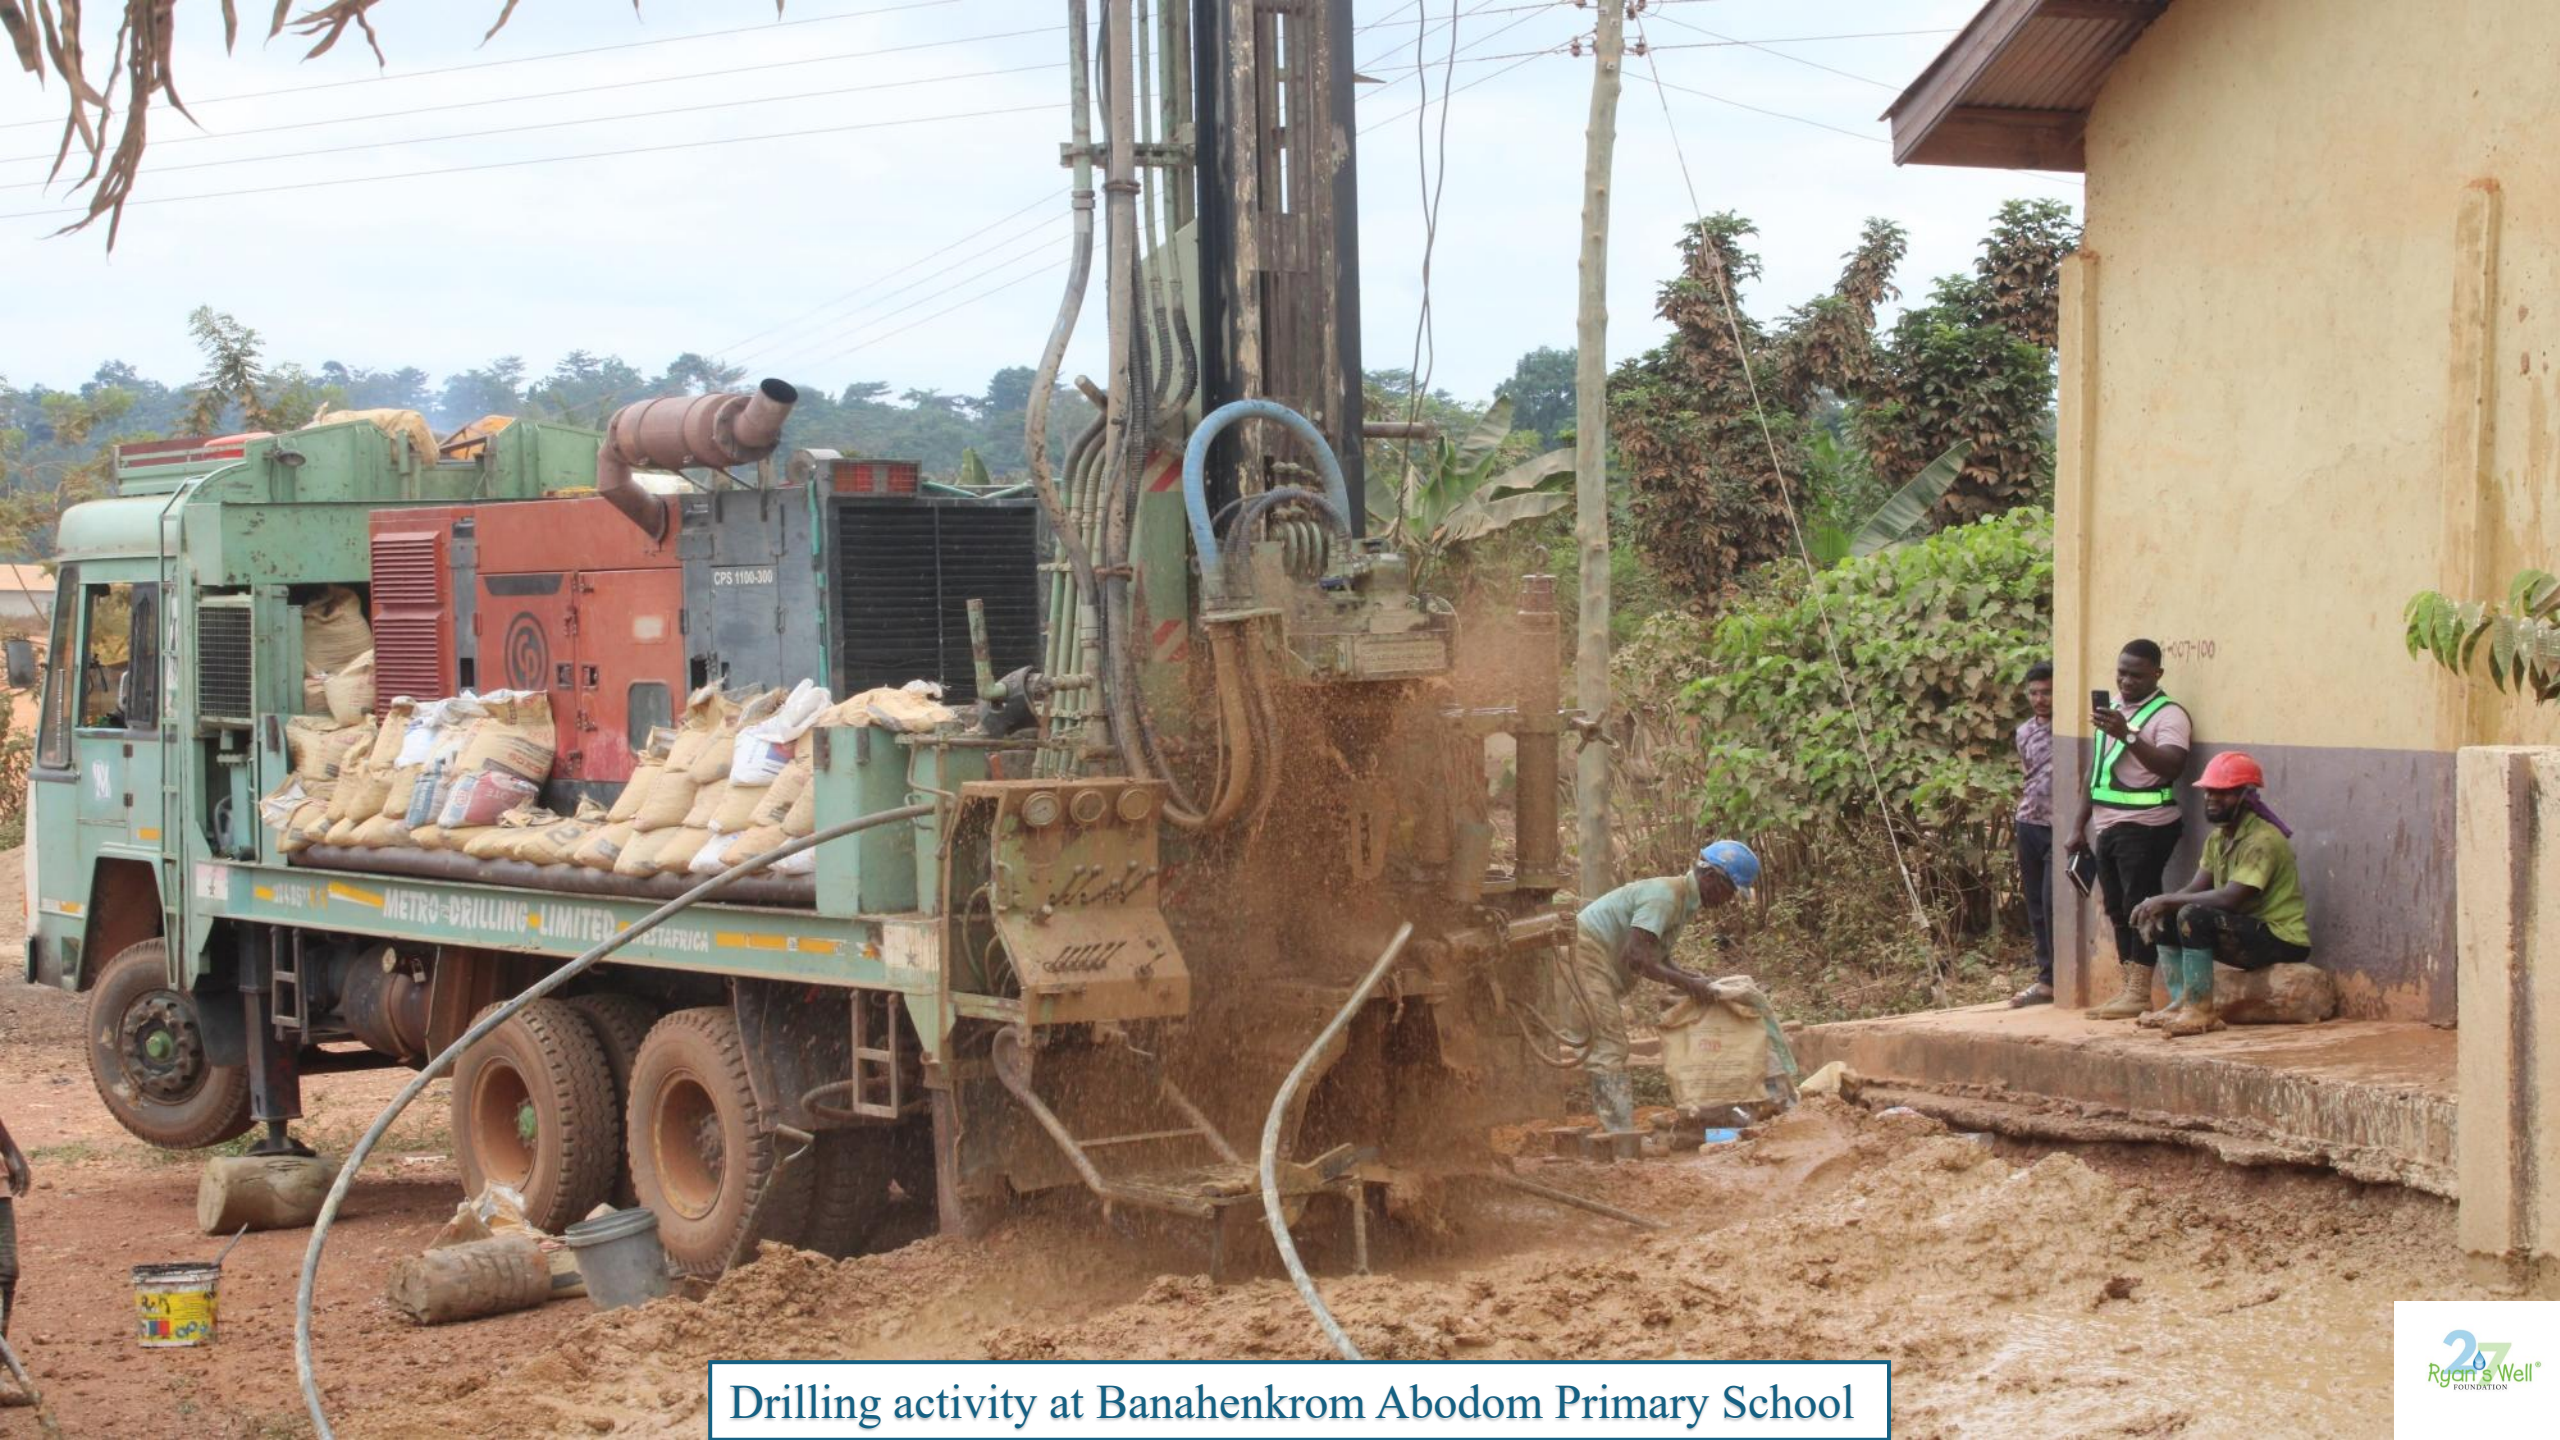

Conclusion:

The Phase II WASH intervention in the Ashanti Region is a significant step toward improving child health, education outcomes, and community resilience. The initiative reflects Ryan's Well Foundation's continued commitment to providing sustainable, safe water access and hygiene education in schools and communities across Africa.

RYAN'S WELL FOUNDATION

GHANA PHASE TWO WASH PROJECTS

Drilling activity at Banahenkrom Abodom Primary School

Aburaso Nweneso P/Sch. Well drilling

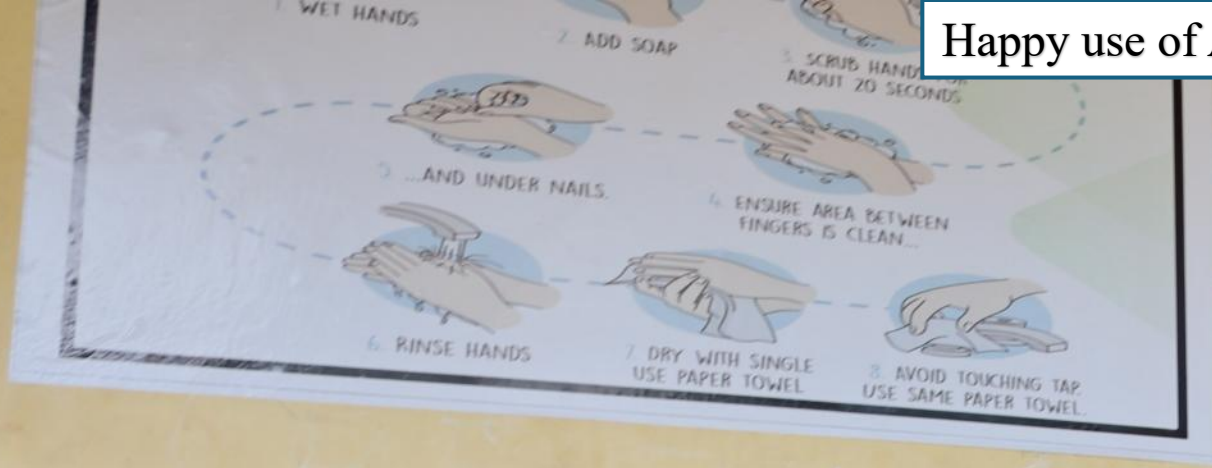

Construction of water Reservoir support structure

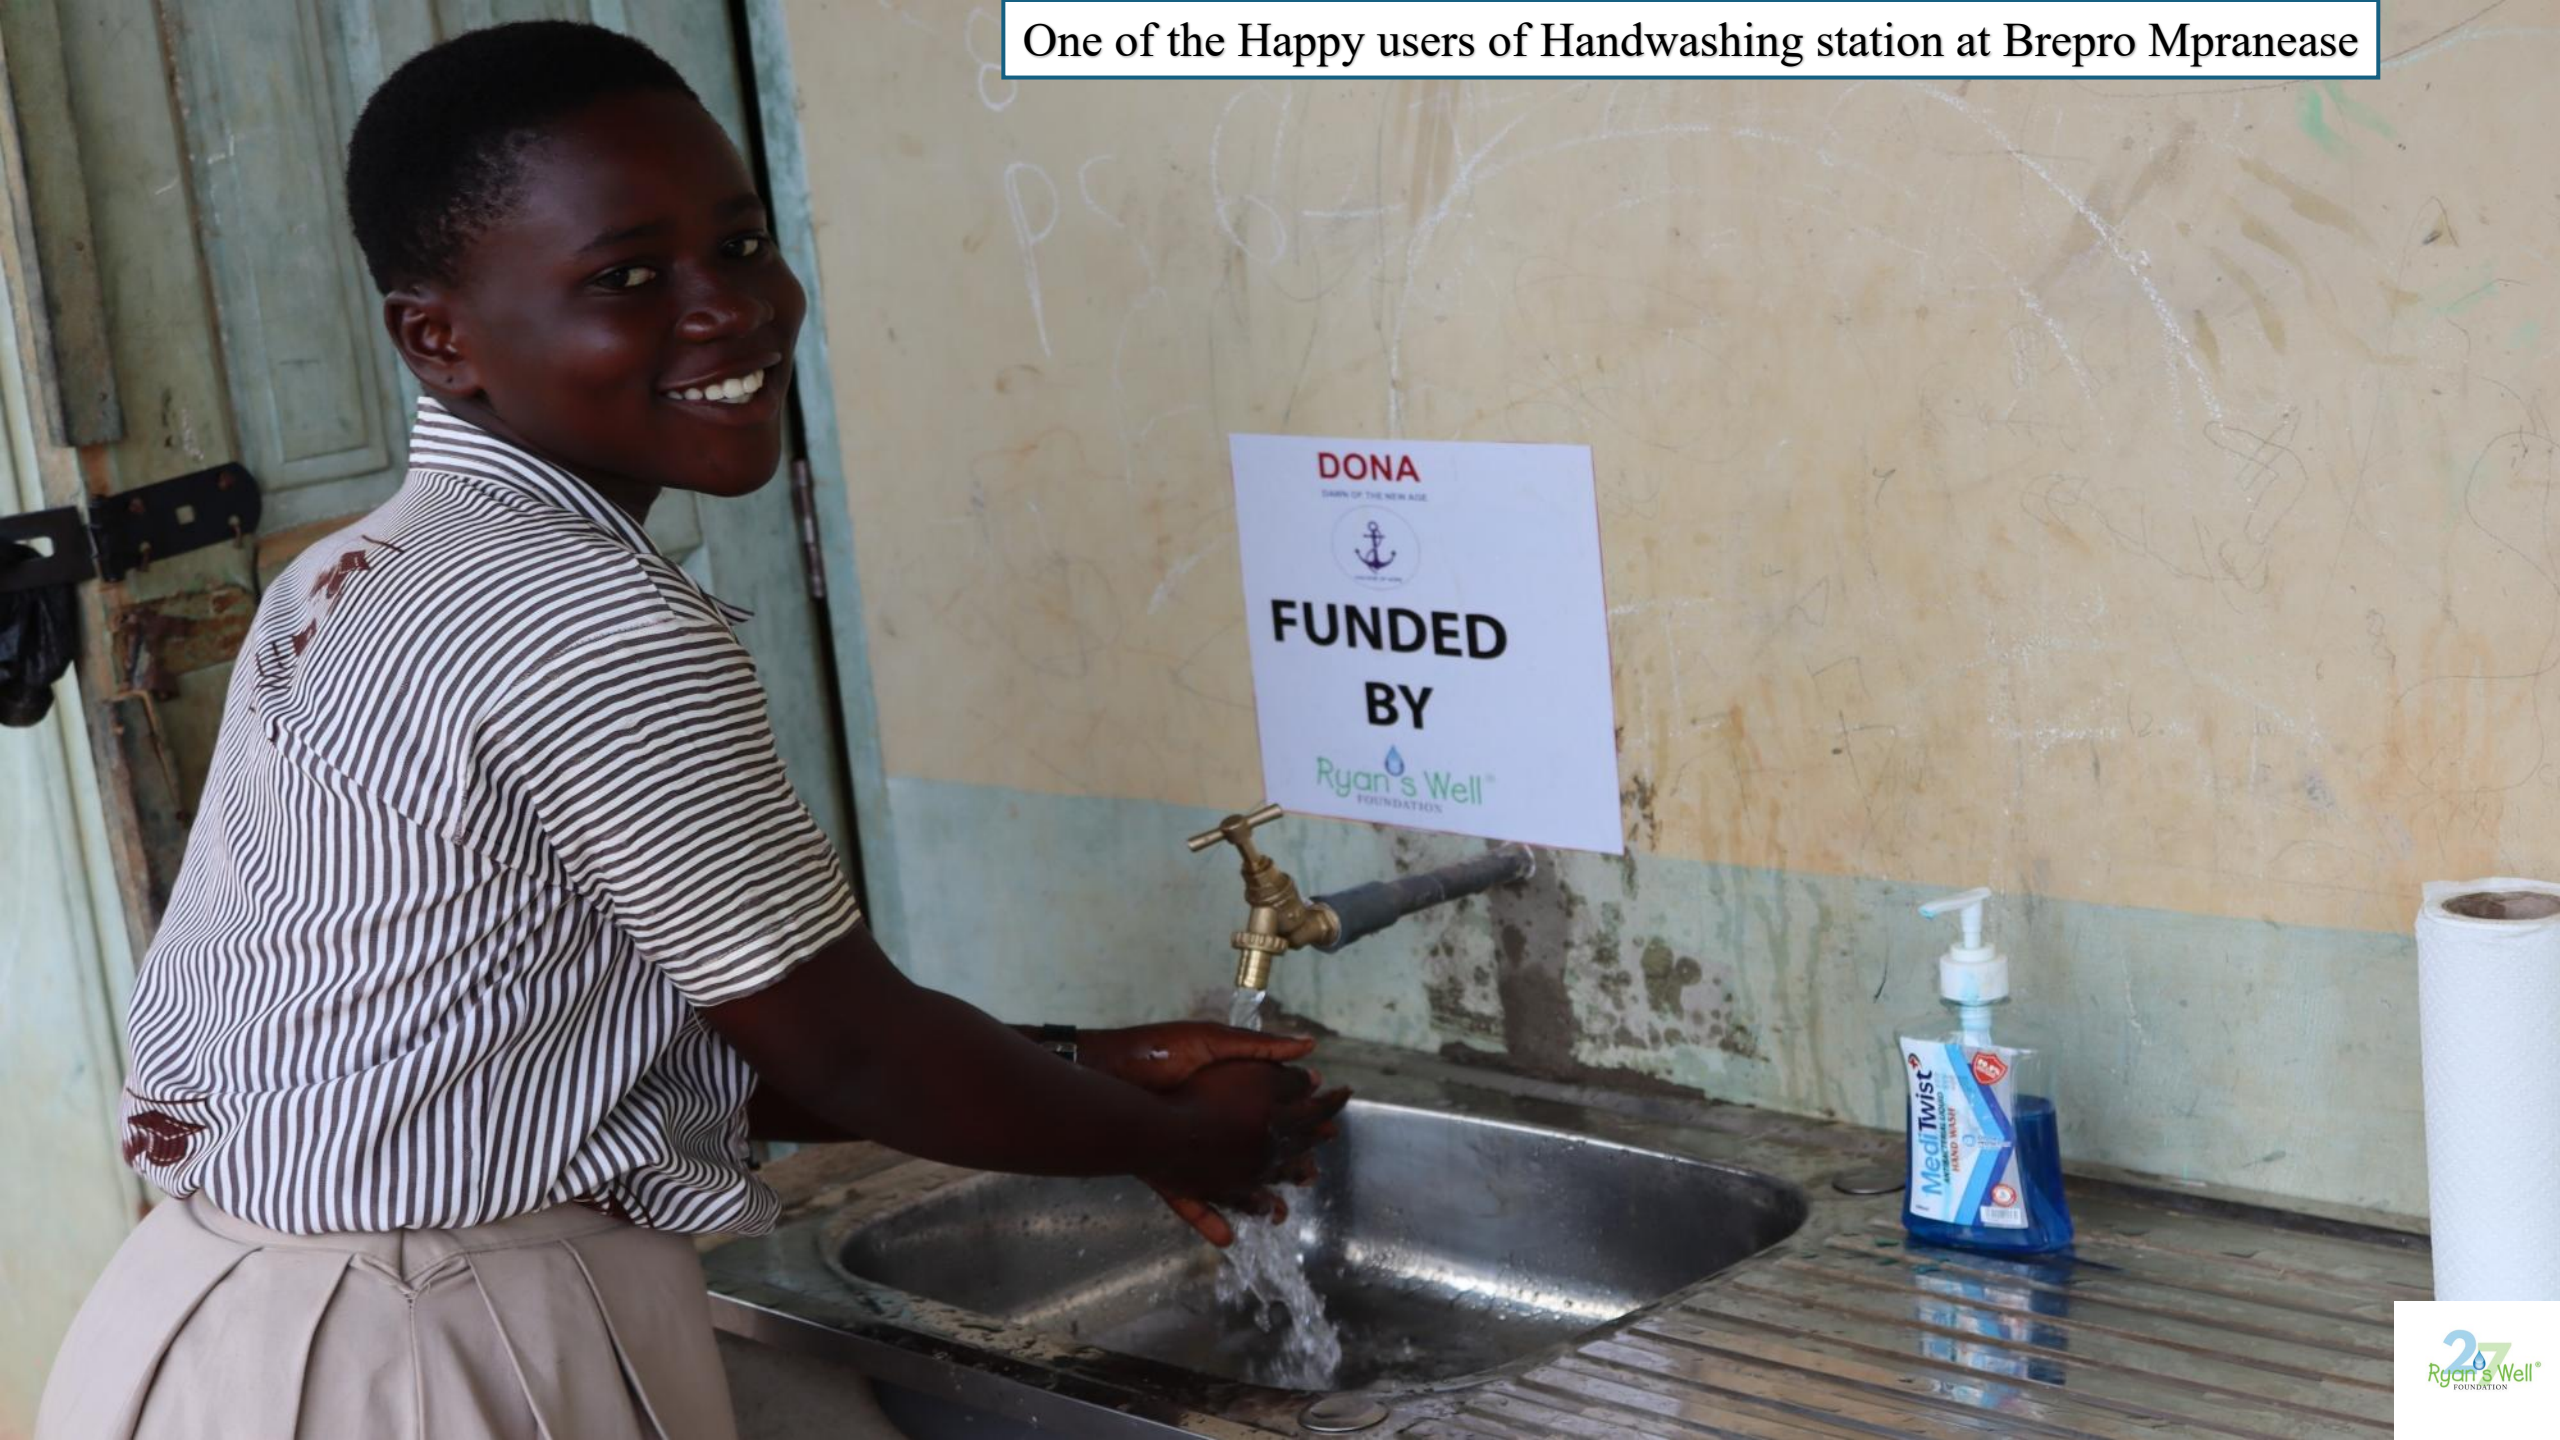

Construction of hand washing station/sink at Bokuruwa P/s

Happy use of Amokrom Nahin P/s

One of the Happy users of Handwashing station at Brepro Mpranease

From struggling for water to smiling ☺☺☺☺
